

Our Website Design Process

START

CONGRATULATIONS!

Your new website is on the way!

DISCOVERY

You will receive an email with a Website Questionnaire. Fill it out and send it back along with as much information as you can for your site. We will give you a call to learn more and share ideas. We can even meet in person if you are in Houston ☺

RESEARCH

Once we receive the questionnaire, we'll conduct a light research of your competitors' website. We'll run a keyword analysis & create list of suggestions for you. All results we'll be shared with you.

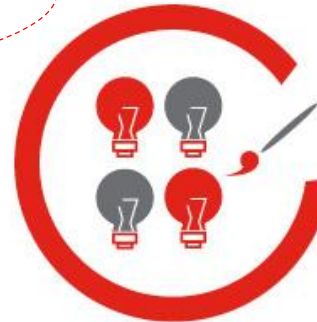

DESIGN

Now is time for the fun part!

We'll propose 3 options for your Homepage layout design. You can mix the designs and decide on the one you like the most.

Then we'll do the same for the inside pages. Next you decide the images, videos, custom forms, banners, and colors.

CODING

Once you approve the final look, we get started with the coding!

You will receive a temporary link to see your website while it's in the works. We don't like to keep the mystery...you know, to avoid unpleasant surprises at the end.

Here's we'll do all the setups, Installs, Plugins, & Updates needed to make your site look stunning and mobile friendly!

TESTING

You can depend on our experience to make sure all the links and coding on your site works perfectly and your site navigation runs smoothly.

We'll review all page title, meta description, and keywords.

Making sure your website is SEO friendly too!

LAUNCH

Time to show your brand new website to the world!

Once your site is launched, we don't disappear. We are always available for any questions or updates you may need.
